

***Our Mission***

Our mission is to serve our customers competently, cost effectively and with integrity. Bison Rail Systems is committed to being a “Value Added” DBE/MBE/SBE partner. Since our founding in 2004, Bison Rail Systems has worked on rail projects throughout the United States and Internationally. We apply our knowledge and experience for the good of our customers.

***BRIAN L. CLARK, MANAGING MEMBER***

Brian established Bison Rail Systems in 2004 as a “Value Added” provider of railway systems services, with a primary focus on railway signaling. Brian Clark has substantial experience in the technology and application of railway signal systems and control center technology. His career in the field of railway signaling has included extensive experience with an unusually wide range of technologies: relay and processor-based interlocking; various wayside signal hardware.

Brian recognizes that our clients are paying for a result and not just a service, and to achieve that result Bison Rail Systems commits to technical competence, strong work ethic and integrity.

Bison is focused on substance and not just form.

Bison Rail Systems has worked internationally on rail systems projects in Brazil, Venezuela, Puerto Rico, England and Germany

“

*Brian*

*Your team was knowing professional and left a positive impression. I'll call you tomorrow when I get to DC. Please let your team know that I appreciated their attitude and efforts.*

*This is good for both parties*
