

INTERIOR INNOVATIONS

Ideas today for a better experience tomorrow.

When designing a space you have to do more than just provide a spot for each person to function. **You have to create a space that inspires. Excites. And makes them feel energized.** Because that's the kind of environment that fuels productivity, ignites creativity, and makes everyone feel that this is a place where they can grow and flourish.

Creating this type of environment is in our DNA. As descendants of the Mayan culture, we know how to use architectural elements and design to make a space a source of inspiration—all while weaving practical thinking and cost-effective solutions into every plan. So when we're done, you'll have a space that inspires, yet still provides dividends for many years to come.

At Interior Innovations, our experienced space planners, designers, installers, project managers, and manufacturers will ensure that your project will run smoothly from start to finish.

SERVICES

Design & Planning

Project Management
