

REMODEL • INSTALL • R EPAIR

No matter the size and scale, Raikos Electric provides electrical contracting services for installation in the commercial, residential, and industrial fields; this includes new construction (Core & Shell) to interior fit-outs.

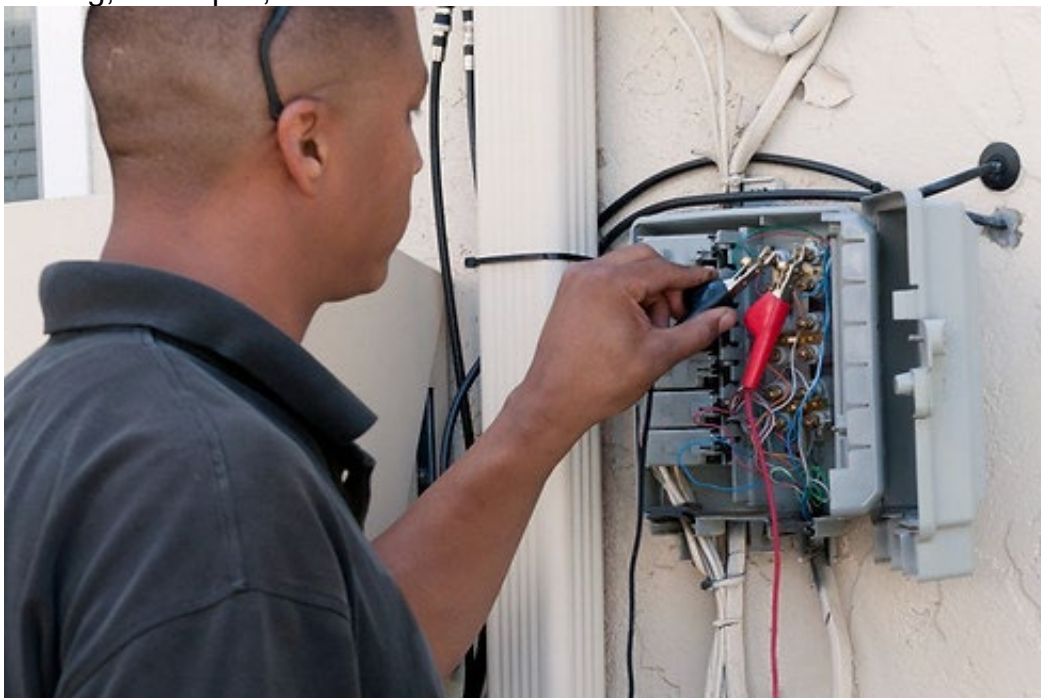

01. Our Services

Maintenance Services

Raikos provides maintenance services for existing buildings and facilities for all electrical services, fire alarms, BMS, lighting, and other needs, and all communications cabling, fiber optic, and data transmission installations.

02. Our Services

Property Owner Maintenance

We provide special critical systems such as fire alarms, building management services, etc. We also specialize in engineering and pre-construction budgeting for construction managers and general contractors' existing customers to assist in obtaining new work.

03. Our Services

Drafting & Engineering Services

Raikos provides drafting and engineering services via BIM services and Auto Cad coordination to provide better efficiency for project details and accurate coordination for an expedient installation to allow the clients' projects to meet their scheduled milestones.
